BILL OF MATERIALS

ABOUT THIS BILL

Assembly

[Part number and name of the finished item]

Drawing and revision

Quantity to build

Prepared by and date

PARTS

[illegible]

Level 0 is the finished item. Level 1 parts go straight into it, and a level 2 part goes into the level 1 part above it. Total qty is how many go into one finished item: the quantity per, times the total of the part above. Line cost is total qty times unit cost. Made parts carry no unit cost here, because their cost comes from the material under them and the time on the routing.
